

MID TERM AI 2

— Online

Artificial Intelligence - Grade 6 | Grade 6 — Section B

Total Marks: 20

Total Questions: 5

Due: 2026-07-31

Instructions

Please read all questions carefully. Select only one answer for multiple choice questions. Manage your time effectively.

Questions

1. [2 marks]

Which of the following best describes a 'neural network' in artificial intelligence?

- A. A network of computers that share data
- B. A set of algorithms inspired by the human brain that recognize patterns
- C. A type of robot that can move and learn
- D. A database that stores information for AI systems

2. [2 marks]

In supervised learning, the AI model is trained on data that includes both input features and the correct output labels.

3. [2 marks]

The process of an AI system improving its performance over time by learning from data is called ____.

4. [5 marks]

Explain how an AI-powered recommendation system (like on a streaming platform) might learn your preferences. Give one example of how it could suggest a new movie based on your past viewing history.

5. [9 marks]

Discuss the ethical implications of using facial recognition technology in public spaces. Consider both benefits (e.g., security) and risks (e.g., privacy). Propose two guidelines for responsible use of this technology.
